AI literacy training

Practical training designed to enhance AI literacy, unlock opportunities and mitigate risks associated with AI

AI literacy training

Artificial intelligence is transforming business models, reshaping industries and driving innovation. Organisations must comply with the EU AI Act and ensure safe, transparent and accountable AI use.

Our AI literacy training is suitable for businesses of all shapes and sizes, providing you with the skills and knowledge to unlock opportunities presented by AI tools, while also safeguarding against potential risks.

Modules

AI literacy training

The EU AI Act requires businesses deploying AI systems to ensure their personnel are informed users. Our training course equips you with the skills and knowledge needed to use AI systems responsibly.

During the training session, we will explore:

What is AI literacy?
— The definition and importance of AI literacy as per the EU AI Act.

What is the obligation and to whom does it apply?
— Implementing measures to ensure a sufficient level of AI literacy of staff and other persons dealing with the operation and use of AI systems on your behalf.
— Persons under the organisational remit (e.g. employees, contractors, service providers).

How can you comply?
— Measures to be applied during the use of AI systems to ensure optimal performance and compliance.
— Protocols and guidelines for safe and effective use of AI technologies.

Examples of AI literacy compliance
— Role of the European Artificial Intelligence Board in promoting AI literacy.
— Development of voluntary codes of conduct to enhance AI literacy.

What are the AI literacy requirements?

— General understanding of AI within organisations.
— Roles of providers and deployers of AI systems.
— Risk assessment and mitigation strategies for AI systems.

Throughout the training, we use practical examples to demonstrate how to integrate AI literacy into your organisation. This course is designed for anyone within the organisation and we can tailor the content to specific groups if preferred.

This is a 60-minute training session, including a 15 minute Q&A.

The session can be delivered in-person or virtually.

Course leads

Ashley Williams, Partner
Ashley Williams is a Partner and co-leads our Technology Transactions Group. He is a technology lawyer specialising in non-contentious technology and data protection matters. He works with high-growth tech companies and multinational corporations, helping them exploit technology assets and navigate data protection issues.

Anne Rose, Managing Associate
Anne is a Managing Associate in our Technology Transactions Group and co-leads the Blockchain Group. Anne has experience in advising on emerging technologies such as blockchain, artificial intelligence and machine learning, data and privacy issues and a wide range of IT and commercial contracts.

Raj Shah, Managing Associate
Raj is also a Managing Associate in the Technology Transactions Group. He provides pragmatic advice to a variety of technology-focused businesses that operate across a range of sectors throughout their business lifecycle, and has a particular focus on AI and machine learning.
